- Independent, locking squeegee/floodbar angle adjustments
- Open access for easy screen viewing and setup
- Heavy-duty casters for easy shop mobility
- Dwell timer or foot pedal control
- Automatic, adjustable peel rate
- Digital counter

The Accu-Print™ semi-automatic screen printer is one of A.W.T.'s most versatile units. Easy to set up and operate, the Accu-Print offers the performance and controls of larger, more expensive printers and produces top-quality results.

Features not normally found on a mid-size printer come standard with the Accu-Print. The printer's universal masterframe is designed to hold all frame types and securely locks them into place for proper registration and accurate print repeatability. DC-powered squeegee carriage delivers an extremely smooth and consistent print stroke.

The Accu-Print is available with hundreds of pallets suitable for bag printing in sizes up to 19 x 25" (48 x 64 cm). All-aluminum Stay-Flat™ pallets are covered with heat-resistant rubber to provide the flattest and most secure printing surface possible. The maximum print size for the Accu-Print is 15 x 25" (38 x 64 cm), and pallet shapes for specialty bags or other items can be custom made to fit your specific application. Stroke length
